Government Manufacturing Conference

Supporting the Federal and Defense Supply Chain

Even during these times of decreasing federal budgets, the Federal Government is now and will continue to spend billions of dollars on manufactured goods and related services.

The Federal government depends on manufacturers that can deliver on time, at projected cost, and meet all performance requirements. This requires an understanding of their priorities, requirements, challenges processes and systems.

On March 12 – 13, you will have the opportunity to:

- * Learn about current and upcoming opportunities,
- * Receive general and agency specific technical training
- * Meet with and learn from Federal agency representatives, Federal Prime Contractors and experienced Federal Sub-contractors
- * Learn about critical topics including Responding to a Requirement, Wide Area Workflow (WAWF), Quality, Export Compliance, Federal Small Business Programs, Federal Acquisition Regulations, and Working with a Federal Primes
- * Learn about the requirements and procurement process of Federal agencies such as TACOM, TARDEC, and DLA
- * **And much more.....**

On line registration and updated information is available at
